BofA Merrill Lynch 1-3 U.S. Year Treasury Index is an unmanaged index that tracks the performance of the direct sovereign debt of the U.S. Government having a maturity of at least one year and less than three years. Qualifying securities must have at least one year remaining term to final maturity, a fixed coupon schedule and a minimum amount outstanding of \$1 billion. Bills, inflation-linked debt, and strips are excluded from the Index; however, original issue zero coupon bonds are included in the Index, and the amounts outstanding of qualifying coupon securities are not reduced by any portions that have been stripped. Index constituents are capitalization-weighted based on their current amount outstanding. Indices are unmanaged and are not available for direct investment.
